About Me

Computer Science graduate from Pertamina University in South Jakarta, with a primary focus on data analysis for various applications and a special interest in AI/machine learning. Experienced in meticulously conducting data analysis and ensuring data quality. Always enthusiastic to work with precision and deliver the best insights. Committed to devising innovative strategies in data analysis to meet user satisfaction and support business growth.

Interests

I am passionate about various aspects of computer science and data analysis, with a particular focus on: Machine Learning, Artificial Intelligence, Statistics, Data Science, Data Analysis, Sports Science.

Skill

Languages: Python, SQL, java, html, and css

Skills:

- **Python:** Programming Fundamentals, Data Structures, NumPy, Pandas, Data Cleaning, Data Visualization, SQL Integration
- **Microsoft Excel:** Data Manipulation, Formulas and Functions, PivotTables, Data Cleaning, Charts and Graphs
- **SQL:** Database Basics, Querying, Joins, Grouping and Aggregation, Filtering and Sorting, Data Modification

Work Experience

Indonesia Biru Foundation

july. 2021 - oct. 2021

Android Developer

Java, mobile-app, Git, GitHub

- Developing an Android-based application for diving spots in the Lombok region, aiming to provide information about diving locations in Lombok to enhance the number of diving tourism in the area.

Education

University Pertamina

graduation: May. 2023

Computer Science and | [Link to all courses](#)

Relevant Courses: Machine Learning, Kalkulus, Probability and Statistics, Object-Oriented Programming (OOP), Basis Data

Thesis: Prediction of Basketball League Match Results in NBA Using Multivariate Quadratic Method

- Two types of datasets, Dataset 18 and Dataset 22, were used to create prediction models.
- These models analyze how a team's total points are influenced by player scoring, successful 3-point shooting, successful free throws, and the last pass before scoring.

Projects

Skin Detective

Jul. 2023

Instant healthcare access and skin disease identification app.

Python, Java, Firebase, MachineLearning, Git

- Hospital Directory: Browse hospitals with details, specialties, and reviews.
- Doctor Consultation: Connect with doctors for medical advice and consultations.
- Skin Disease Detection: Use ML to analyze images and get disease information.

Polution Model

Sep. 2021

Make Air Polution Model Jakarta

Python, Machine Learning, Jakarta, Polution, Git

- Data Analysis and Logistic Regression Prediction using air pollution index in DKI Jakarta.
- Utilized machine learning methods, including Visualizations, Logistic Regression, and One-Hot Encoding.
- Visualized numerical and categorical air pollution data, including time series data.
- Applied Logistic Regression with ordinal scale for modeling air pollution data.
- Employed One-Hot Encoding to manipulate categorical data in the 'lokasi spku' column.
- Modeled based on Minister of Environment Decree No. KEP 45/ MENLH/ 1997 air quality index ranges.

Organization

Cite Up

jun. 18 - nov. 2018

Humas

- Computer and It Event Universitas Pertamina(Cite Up) is an annual competition by Computer Science Universitas Pertamina.
- assist the Cite Up teams in contacting a guest and make a guest comfortable. I am here to provide support and ensure that our guests have a pleasant and comfortable experience..

Himpunan Mahasiswa Ilmu komputer

Sep. 18 - Jun. 2019

Humas

- serves as the primary communication channel between the student organization and its members.
- collaborates with other teams within the student organization to plan and execute various events and programs.

Certifications

Certifications:

- **(2021):** Successfully completed Python OOP with exercise project in 2021
- **(2021):** Successfully completed Data Visualization in Excel in 2021
- **(2023):** Mastering AI Bootcamp - Batch 1

Education

Bachelor Degree in Computer
Science Universitas Pertamina

Expertise

- Data Cleaning, Data Visualization
- Version Control
- Android Development
- Database Basics, Querying, Joins, Grouping and Aggregation, Filtering and Sorting, Data Modification

SOFT SKILLS

- Communication skills
- Teamwork and collaboration
- Adaptability

Work Experience

- Jul 2021 - Oct 2021
Indonesia Biru Foundation
Android Developer

- Developing an Android-based application for diving spots in the Lombok region, aiming to provide information about diving locations in Lombok to enhance the number of diving tourism in the area.

Project & Research

- **Research**
May 25, 2022

The research with the lecturer aims to propose a System Requirement Specification (SRS) for an app that bridges waste collectors and households, facilitating the collection and sorting of economically valuable waste while promoting sustainable waste management practices.

- May 25, 2022
Mobile TANI
Android Developer Project

- E-Commerce Mobile Tani is a mobile app that simplifies the buying and selling of agricultural products in Indonesia. Designed to meet local needs, farmers can list their products for sale, and buyers can easily search and discover the agricultural items they need.
- https://youtu.be/L_w-oDJmsm4

- May 11, 2023
Model Prediction
Machine Learning

- Predicting NBA game outcomes using multivariate quadratic polynomial and standard linear regression. Steps include data scraping from internet, cleaning, and analyzing features from Dataset 18 and Dataset 22 like player scoring, 3-point shots, free throws, and the last pass before scoring. Aimed at providing concise insights for fans and team management.

- July 23, 2023
Skin Doc
Android Developer Project

- Developing Mobile App with machine learning algorithms, offers users a quick and reliable method to identify potential skin disease using just their smartphones

Mengetahui,
Ketua Program Studi

Muhamad Koyimatu Ph.D
NIP. 116108

UNIVERSITAS PERTAMINA

dengan ini menyatakan bahwa

Boy Cakraningrat

telah menyelesaikan dengan baik dan memenuhi semua persyaratan pendidikan Sarjana pada

Program Studi : Ilmu Komputer

Fakultas : Sains dan Ilmu Komputer

Sehingga kepadanya diberikan gelar **Sarjana Ilmu Komputer (S.Kom.)**

beserta hak dan kewajiban yang melekat pada gelar tersebut.

Diberikan di Jakarta pada 20 Mei 2023

Rektor

Universitas
Pertamina

Prof. Dr. Ir. Wawan Gunawan A. Kadir, M.S.

Dekan

Prof. Dr. Ir. Rudy Sayoga Gautama Benggolo
